- Analytical methods in spice processing
- Project report, DPR preparation and technology support from CSIR-CFTRI
- Packaging strategies in spices
- Food safety standards and regulation in spice processing
- Fumigation of spices
- Startup opportunities in spice processing (experience sharing/success stories)
- Practical demonstration

## *About the Workshop:*

India is the world's largest producer, consumer and exporter of spices; the country produces about 75 of the 109 varieties listed by the International Organization for Standardization (ISO) and accounts for half of the global trading in spices. Indian spices are the most sought-after globally, given their exquisite aroma, texture, taste and medicinal value. India has the largest domestic market for spices in the world. Spice production in India during 2020-21 stood at 10.7 million tonnes growing at an 8% Compound annual growth rate since 2014-15. For the year 2020-21, the country continued its upward trend and exported spices worth US\$ 4.18 billion, a 34% increase from the year 2019-20. CSIR-CFTRI is organizing one day exclusive workshop focusing on the spice processing under CSIR Integrated Skill Initiative. The daylong session would be an ideal opportunity for budding entrepreneurs / micro-entrepreneurs / startups / SHGs / and entrepreneurial aspirants. The Institute has expert faculties who have considerable years of experience in the area of processing, value addition, analysis, packaging, and fumigation of spices. Those who are interested may register at <https://www.cftri.res.in/sdp>

## *About CSIR-CFTRI:*
