

Title:	A device useful for continual forming and dispensing of doughnut shaped batter for making traditional vada
Abstract:	<p>This invention relates to a device useful for continual forming and dispensing of doughnut shaped batter for making traditional vada. The prepared batter is formed in to doughnut shape and dispensed into deep fat fryer and fried in three stages (first frying, cooling and second frying) to get golden colored crisp product and served immediately for consumption. In this context forming and dispensing of vada in a definite shape to the know quantity accurately into a deep fat fryer, in a hygienic manner and at the lowest possible cost is a very critical operation to derive an acceptable product.</p>
