Revised Detailed Technical Specifications for Rhemoter Based on Pre Bid Conference

	1.MAIN INSTRUMENT	
1.1. Measuring head type	Direct current synchronous rotational & oscillatory motor transducer mode. under simultar & oscillation.	motor or Single for combined motor neous rotational shear
1.2. Torque Range	1.2a. Min. Torque (Rotation / steady shear)	1.00 nNm or lower
	1.2b . Min. Torque (Oscillation)	0.50 nNm or lower
	1.2c. Max Torque	200 mNm or above
1.3. Motor Bearing	Air Bearings / Magnetic Bearing	S
1.4. Motor control	Digital current source with high	-speed digital signal
1.5 Speed Dance /	0 To 300 Pad /s or better	
Angular Velocity		
1.6. Frequency Range	10E ⁻⁶ To 100 Hz or Better	
1.7. Strain Sensor /	Optical Encoder	
Displacement Sensor/ transducer		
1.8. Measurement Types	Rotational, Oscillatory and Tran	sient (Creep &
1 9 Normal Force Range	0.005 N To 50 N or better	
1.10. Gap Control	Automatic precise Gap Compense	ation related to
(Standard)	normal force.	
1.11. PC Interfaces	Direct USB Interface, Ethernet	and Serial
1.10.14/	Interface	
1.12. Warranty	Minimum one-year onsite warran	ty from the date of
	To quote for 5 years AMC nort	warnanty this will not
	be considered in the ROO	waitanty mis will not

1.13. Spares & Servic	2	Support availability: Minimum 10 years from the date
		of satisfactory installation.
1.14. Upgradability		The rheometer should be upgradable to Starch
		Pasting Cell, Tribology cell, Fluorescence Microscopy,
		Rheo-Raman, Humidity Attachment, Small Angle Light
		Scattering. This should be invariably confirmed on
		the manufacturer's website & product brochure.
2	TEM	PERATURE CONTROL DEVICES
2 1 A Peltier tempera	ture d	control for cone/parallel plate / sand blasted or
Crosshatched or Serra	ted pl	ate measuring geometries
2.2. Temperature Cont	rol	Peltier Temperature Control
· · · · · · · · · · · · · · · · · · ·		
2.3. Temperature Rang	je	5 °C To 200 °C or better
2.4. Max Heating		20 °C /Min or Better
3. REQU	JIRED	GEOMETRIES FOR MEASUREMENT
Plate/Plate &	3.	1 . 40 mm or above Parallel Plate Geometry made of
Cone/Plate		SS-1Qty.
Geometries	3.	2 . 40 mm or above Smooth Surface Cone plate (SS)
		with 1 or 2 Degree - 1 Qty.
	3.	3 . 40 mm or above - sand blasted or Crosshatched
		or Serrated plate - 1 Qty.
	3.4	4 . The above Geometries should have auto tool
		recognition or similar mechanism by the
		rheometer software.
4. /	ADVAI	NCED RHEOLOGY ACCESSORIES
		4.10. Rheo Microscope:
		4.11 . Temperature range: -10 to100 Deg. C or
		better
		4.12 . Temperature controller type: Peltier
		4.13 . Suitable Heating rates & Cooling rates
		4.14 . high-resolution camera or Color CCD Camera
		for Image/ video Capturing
4.1. Microscopy		4.15. Mode: Polarization microscopy for birefringent
Attachment		samples, brightfield or darkfield
		4.16 . Objective Lens with 20X (Long working
		distance) Magnification with correction for the
		optical properties for best image quality

	4.17. High intensity LED light source or Modular
	Light source
	4.18 . Rheometer / Microscopy / Software should
	capable of automatically records images and video
	simultaneously during rheological testing of samples.
	4.21 . The Powder Rheology Accessory should provide
	ambient measurements of both consolidated powder
	(Shear) and loose, free-flowing powder (Flowability).
4.2. Powder Rheology	4.22 . Should be offered with the powder shear cell
accessories	4.23 . Software should be able to measure the Bulk
	Density, Wall friction angle, Caking, compressibility
	cohesion, flow function, yield strength, angle of
	internal friction
	5.UTILITIES
5.1. Air Compressor	100Psi, 5cfm Oil-free or Suitable
5.2. Air Dryer	Multistage with Micro-filters or Suitable
5.3. Circulator / Chiller	Suitable circulator/chiller to be quoted, for proper
	functioning of the Rheometer, in the given
	temperature range and compatible for future
	upgradeability.
	5.4.1. Computer DELL / HP or equivalent (factory
	Installed software, Licensed windows 11, 64bit, MS
	office packages - commercial license) with 19
	processor (11" Generation or better), 32 GB ram,
5.4. Desktop Computer,	21B SSD, 4GB or higher NVIDIA graphics card,
Printer & Table	Keyboard and Mouse, licensed anti-virus software,
	DVD writer, Speaker, Connectivity- Wi-Fi 5 (11ac,
	2x2) or better Bluetooth 4.0, 26" or above ultra-
	wide screen LED monitor, USB HD Webcam with
	Built-in Mic or Inbuilt HD Web CAM, USB 3.0/1394b
	firewire port, USB 3.2 Type-C, suitable HDMI and
	RJ45 ports. The system should compatible with the
	rheometer / software/ microscopy . – 1 No
	5.4.2. Computer DELL / HP or equivalent (factory
	installed software, Licensed windows 11, 64bit, MS
	office packages - commercial license) with i7
	processor (11 th Generation or better), 16 GB Ram,

	2TB SSD, 4GB or higher NVIDIA graphics card,
	Keyboard and Mouse, licensed anti-virus software,
	DVD writer, In-built Speaker, Connectivity- Wi-Fi 5
	(11ac, 2x2) or better Bluetooth 4.0, 22" or above
	ultra-wide screen LED monitor, USB HD Webcam
	with Built-in Mic or Inbuilt HD Web CAM. USB
	30/1394b firewire port USB 32 Type-C suitable
	HDMT and RJ45 ports The system required for
	nost data processing / rheological regression model
	fitting should compatible with the rheameter
	software - 1 No
	543 All-in-One Color Loser Printer (HP Loser Tet
	Pro MED M128 fue on equivalent) Auto Duplay Scan &
	Conv. ADE with Built in Ethernat and Wi fi Direct 1
	No
	FAA Suitable withoution from table for main
	5.4.4. Suitable vibration free table for main
	Instrument shall be provided - 1100.
5.5. Warranty	Minimum one-year warranty on computer & monitor.
5.6. Installation &	Installation & Commissioning, Training &
Commissioning	demonstration of operating procedure of the
	instrument are under the scope of the supplier.
6	. RHEOLOGY SOFTWARE
6.1. Architecture	Template based with at least 100 built-in Templates
	Pre-Programmed for all Types of Materials
6.2. Analysis Modules	Integrated Modelling/Curve Fitting, Rheo-Optics
	Adapter Module, Squeeze Flow Rheology and
	Extensional Rheology Modules.
6.3. Testing Protocols	6.31. Oscillation Mode Tests:
	a Torque/Stress sweep (linear or loo) at
	single frequency
	Single IT equency
	b. Frequency sweep (linear or log) at single
	torque
	c Frequency sween (linear or loo) at single
	strain
	d. Strain/angular displacement sweep

 (linear or log) at single frequency e. Temperature sweep at single frequency/torque f. Superimposed stress oscillation and steady shear g. Superimposed strain oscillation and steady shear h. Multiple simultaneous frequencies superimposed on above modes 6.32. Flow Mode Tests: a. Controlled stress or torque sweeps. b. Controlled rate (1/s) or speed (rad/s) sweeps. c. Stress stepped flow. d. Equilibrium stress stepped flow (ensures material has time to respond to each level of stress). e. Temperature sweeps at constant stress or rate.
 e. Temperature sweep at single frequency/torque f. Superimposed stress oscillation and steady shear g. Superimposed strain oscillation and steady shear h. Multiple simultaneous frequencies superimposed on above modes 6.32. Flow Mode Tests: a. Controlled stress or torque sweeps. b. Controlled rate (1/s) or speed (rad/s) sweeps. c. Stress stepped flow. d. Equilibrium stress stepped flow (ensures material has time to respond to each level of stress). e. Temperature sweeps at constant stress or rate.
frequency/torque f. Superimposed stress oscillation and steady shear g. Superimposed strain oscillation and steady shear h. Multiple simultaneous frequencies superimposed on above modes 6.32. Flow Mode Tests: a. Controlled stress or torque sweeps. b. Controlled rate (1/s) or speed (rad/s) sweeps. c. Stress stepped flow. d. Equilibrium stress stepped flow (ensures material has time to respond to each level of stress). e. Temperature sweeps at constant stress or rate.

or rate.
(22 Crear Made Testa
0.33 . Creep Mode Tests;
a. Constant stress creep and recovery.
b. Automatic sensing of steady state
during creep test.
6.34. Suitable software for Powder rheology
measurement
6.35 Suitable software for Rheo-Microscope
measurement
A Calibration Atom for the set of
0.4 Calibration Manufactures calibration certificate / traceability,
7 0 Shares /consumables / Standards:
Silicon Viscosity Standards to be supplied in bottles each bottle containing at least

500 mL of the standard fluid. Each Viscosity Standard should be duly calibrated at three different temperatures (24, 21 and 18 deg C), and supplied with a certificate of calibration. Accuracy should be +/- 1% (or better) of the viscosity value at the specified temperatures.

Standards (viscosity) and quantities required:

i. 50 CPS: 1 bottle, ii. 100 CPS: 1 bottle, iii. 500 CPS: 1 bottle

8.0 Manuals:

All the operational manual, application manual as well as service manual along with schematic in English are to be provided both as soft copy or hard copy. Test Reports for all the modes of operation to be provided.

9.0 Training at Site:

The supplier shall provide on-site training with regular operation and maintenance of the instrument. Application specialist should provide special training about sample analysis (Data collection, measurements and data analysis, etc.)
